

## Super Seven

It's the bee's knees and the cat's meow! Super Seven (also known as Melody's Stone or Sacred Seven) is a stone of the new world. Its energy is said to be so alive and buzzing it's like a little psychic power station.

It is said that it enhances all psychic skills especially the ability to see Auras. It's a very protective stone that retains its own energy and never needs either cleansing or energising.

This stone is a mixture of seven minerals - Amethyst, Smoky Quartz, Clear Quartz, Rutilated Quartz, Geothite, Lepidochrosite and Cacoxenite

These amazing crystals are found in only one place in the world – the Minas Gerais region of Brazil. It is a naturally occurring phenomenon. It must contain all seven elements to be considered super seven. Sometimes Amethyst Cacoxenite or Smoky Amethyst is sold as super seven.

When you hold it up to the light, you can clearly see the various elements in the crystal.
